WITHIN UNITED STATES

PART 150-ARREST AND DEPORTATION

CHANGES IN PREEXAMINATION PROCEDURE

SEPTEMBER 19, 1944.

The following changes are made in Title 8, Chapter I, Code of Federal Regulations:

Sections 142.3 to 142.7, inclusive, are amended to read as follows:

- § 142.3 Preexamination; application; where deportation proceedings have not been instituted. Application for preexamination shall be filed in triplicate on Forms I-255 and I-55 by the applicant at any office of the Immigration and Naturalization Service. The application may be filed separately or in conjunction with a petition on Form I-133 for nonquota or preference quota status under § 165.1 of this chapter. Where the application for preexamination is filed at a field office, either separately or with Form I-133, the field office shall retain the triplicate copies of Forms I-255 and I-55 and forward the rest of the forms to the Central Office.
- § 142.4 Preexamination; application; where deportation proceedings have been instituted. Where the applicant is the subject of deportation proceedings, the application shall be filed as provided in § 150.6 (g) of this chapter.

- § 142.5 Preexamination; authorization; where deportation proceedings have not been instituted. A designated official in the Central Office shall have authority to authorize the preexamination of any alien eligible under the provisions of § 142.2 against whom a warrant of arrest in deportation proceedings has not been issued.
- § 142.6 Preexamination; authorization; where deportation proceedings have been instituted. The Board of Immigration Appeals shall have authority, subject to the provisions of § 90.12 of this chapter, to authorize preexamination of any alien eligible under the provisions of this part against whom deportation proceedings are pending and to whom the privilege of departure at his own expense in lieu of deportation has been granted in accordance with the provisions of section 19 (c) of the Immigration Act of 1917, as amended (39 Stat. 889, 54 Stat. 671, 56 Stat. 1044; 8 U.S.C. 155 (c)).
- § 142.7 Preexamination; notification of authorization. The Central Office shall in all cases furnish notice of the decision to the field office, which shall in turn notify the applicant in writing of the decision and shall, where the decision is that preexamination is authorized. at the same time notify him that preexamination will not be accorded him unless or until he has submitted to the United States consul to whom he intends to apply for a visa the necessary documents in support of his visa application and has received from the consular officer written assurance that such documents appear sufficient and satisfactory on their face and that a visa will be promptly available if, upon personal examination by the consul, he is found to be eligible for a visa.

In § 142.8, the term "§ 142.3," which occurs twice, is changed to read "§ 142.7." Section 142.9 (a) is amended to read as follows:

(a) The notification in writing that preexamination has been authorized.

Section 150.6 (g) is amended to read as follows:

- (g) Hearing; application for suspension of deportation, for departure in lieu of deportation, or for preexamination. At any time during the hearing the alien may apply, under the provisions of section 19 (c) of the Immigration Act of 1917, as amended (39 Stat. 889, 54 Stat. 671, 56 Stat. 1044; 8 U.S.C. 155 (c)):
- On Form I-55 in triplicate, for suspension of deportation; or
- (2) On Form I-255 in triplicate, for the privilege of departing the United States at his own expense in lieu of deportation; or

(3) On Form I-255 in triplicate, for the privilege of departing the United States at his own expense in lieu of deportation and the privilege of preexamination under Part 142 of this chapter.

The alien may apply simultaneously for more than one of these three reliefs.

The alien shall be warned that any statements made by him in such applications may be considered as evidence in any proceedings to determine his right to enter, reenter, pass through, or reside in the United States, and that false answers to any of the questions in such applications may bar him from the relief which he requests. Any such applications shall then be introduced into evidence and made a part of the record.

Section 150.6 (h) is amended to read as follows:

(h) Hearing; order in which evidence shall be presented. The presiding inspector or examining inspector, when interrogating the alien at the hearing, shall develop in order (1) the facts relating to alienage and nationality; (2) the facts relating to the charges in the warrant of arrest or to any additional charges applicable; (3) the facts relating to the alien's eligibility for any relief applied for under paragraph (g) of this section; (4) the personal history data required by paragraph (j) of this section; and (5) other pertinent information not already obtained for the record.

Chapter IX-War Production Board

Subchapter B-Executive Vice-Chairman

AUTHORITY: Regulations in this subchapter Issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3696; Pri. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

> PART 1010-SUSPENSION ORDERS [Suspension Order S-634]

> > ALLAN H. W. HIGGINS AND LOU C. HIGGINS

Allan H. W. Higgins and his wife, Lou C. Higgins, in November 1943 began construction at 6 Joy Street, Boston without authorization from the War Production Board. The premises at 6 Joy Street was a large four story house which had been most recently occupied as a one-family residence. The construction first initiated by the respondents was limited to the first floor and was for the purpose of preparing an apartment for the respondents' personal use. The construc-tion thus initiated exceeded the \$200 limitation imposed by Conservation Order L-41. In January 1944 the respondents decided to convert the upper floors into nine or ten additional apartments for the purpose of leasing to others. The construction initiated in January 1944 was greatly in excess of the \$1000 limitation permitted by Conservation Order L-41. Allan H. W. Higgins and Lou C. Higgins were aware of War Production Board restrictions on construction and doing this construction without authorization constituted wilful violations of Conservation Order L-41. These violations of Conservation Order L-41 have diverted critical materials to uses not authorized by the War Production Board and have hampered and impeded the war effort of the United States. In view of the foregoing, it is hereby ordered that:

§ 1010.634 Suspension O'rder No. S-634. (a) Neither Allan H. W. Higgins nor Lou C. Higgins their successors or assigns, nor any other person, shall do any construction on the premises at 6 Joy Street, Boston, Massachusetts, including putting up or altering the structure, unless hereafter specifically authorized in writing by the War Produc-tion Board and the Federal Housing Administration.

(b) Nothing contained in this order shall be deemed to relieve Allan H. W. Higgins or Lou C. Higgins, their successors and assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

[CMP Reg. 5, as Amended Sept. 28, 1944]

MAINTENANCE, REPAIR AND OPERATING SUPPLIES

§ 3175.5 CMP Regulation 5—(a) Purpose and scope. (1) The purpose of this regulation is to provide a uniform procedure for obtaining maintenance, repair and operating supplies, both in the case of controlled materials obtained by use of allotment symbols under the Controlled Materials Plan and in the case of materials or products obtained by preference ratings. Persons requiring maintenance, repair and operating supplies, in any form, in such quantities as are available from warehouses or distributors under CMP Regulation No. 4, or at retail without preference ratings or allotments, may obtain the same without using the procedure provided in this regulation, but subject to all applicable limitations in War Production Board regulations and orders.

(2) The provisions of this regulation shall not apply to any governmental agency (other than Claimant Agencies) or to any institution, as the same are defined in paragraphs (b) (1) and (b) (2) of CMP Regulation No. 5A, regardless of whether it is engaged in the production of any product or in any activity or service listed in any schedule attached to this regulation or not. Procedures for the obtaining of maintenance, repair and operating supplies by such governmental agencies and by such persons and institutions are provided under CMP Regulation No. 5A. This regulation is also inapplicable to certain purchases by Claimant Agencies or for export as more fully provided in paragraph (g).

(3) [Deleted Feb. 26, 1944]

Note: Canadians will obtain MRO in the United States under Canadian Order PO 5 B.

(b) Definitions. Maintenance, repair and operating supplies and minor capital additions (which are sometimes collectively referred to as "MRO") have the following meanings in this regulation and in other War Production Board regulations and orders unless otherwise indicated:

(1) "Maintenance" means the minimum upkeep necessary to continue a facility in sound working condition, and "repair" means the restoration of a facility to sound working condition when the same has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts or the like: Provided, That neither maintenance nor repair shall include the improvement of any plant, facility or equipment, by replacing material which is still usable, with material of a better kind, quality or design, except as provided in paragraph (b) (3) of this regulation.

(2) "Operating supplies" means any materials or products which are normally carried by a person as operating supplies according to established accounting practice and are not included in his finished product, except that materials included in such product which are normally chargeable to operating expense may be treated as operating supplies. The term also includes such items as hand tools purchased by their employer for sale to his employees for use only in his business, in those cases where they would constitute operating supplies under established accounting practice if issued to employees without charge.2

<sup>1</sup>See also Interpretation No. 8: Repairs which are capitalized must be treated as capital additions.

(3) Minor capital additions may be obtained under the procedures provided for in this regulation for obtaining maintenance, repair and operating supplies where the cost of the minor capital addition does not exceed \$500 (excluding the purchaser's cost of labor 3) for any one complete capital addition. The term "one complete capital addition" includes a group of items customarily purchased together and all items which would normally be purchased as part of a single project or plan. No capital addition shall be subdivided for the purpose of coming within this paragraph, and where the capital addition involves construction, authorization to construct must be obtained to the extent required by Conservation Order L-41 or by any other applicable order of regulation of the War Production Board.

(4) Production materials required by a manufacturer for physical incorporation in his products, which products he sells for use as maintenance, repair or operating supplies, may be obtained as provided in CMP Regulation No. 1 and in CMP Regulation No. 3, and such production materials shall not be deemed maintenance, repair or operating supplies, as to such manufacturer.

(c) Controlled materials. (1) Subject to the quantity restrictions contained in paragraph (f) of this regulation, any person engaged in the business of producing any product or conducting any business listed in Schedule A, requiring delivery of any controlled material, for maintenance, repair or operating supplies in the conduct of such business, may obtain the same by placing on his delivery order substantially the following certification (or the alternative form of certification provided in CMP Regulation No. 7), signed manually or as provided in Priorities Regulation No. 7:

CMP allotments symbol MRO—The undersigned certifies, subject to the criminal penalties for misrepresentation contained in section 35 (A) of the United States Criminal Code, that the controlled materials covered by this order are required for essential maintenance, repair or operating supplies, to be used for a purpose listed in Schedule I or Schedule II of CMP Regulation No. 5 and that delivery thereof will not result in a violation of the quantity restrictions contained in paragraph (f) of said regulation.

An order bearing such certification shall constitute an authorized controlled material order.

(d) Preference ratings for maintenance, repair and operating supplies. (1) Subject to the quantity restrictions contained in paragraph (f) of this regulation, orders calling for delivery of maintenance, repair or operating supplies other than controlled materials (regardless of whether such supplies be Class A products, Class B products, or other products or materials) are hereby assigned preference ratings as indicated in Schedule A for maintenance or repair of facilities required for producing any product or conducting any business listed in that schedule or for necessary operating supplies for such production or husiness

(iii) [Deleted Sept. 28, 1944.]

(2) A preference rating of AA-5 is hereby assigned for necessary maintenance or repair of facilities required for producing any product or conducting any business not listed in Schedule A, or for necessary operating supplies for any such purpose.

Note: Subparagraph (3), formerly (2), redesignated Sept. 28, 1944.

(3) A preference rating assigned under this paragraph (d) shall be applied only by use of the following certification (or the alternative form of certification provided in CMP Regulation No. 7), signed manually or as provided in Priorities Regulation No. 7:

Preference rating \_\_\_\_\_ (specify rating)—MRO. The undersigned certifies, subject to the criminal penalties for misrepresentation contained in section 35 (A) of the United States Criminal Code, that the items covered by this order are required for essential maintenance repair or operating supplies; that this order is rated and placed in compilance with CMP Regulation No. 5; and that the delivery requested will not result in a violation of the quantity restrictions contained in paragraph (f) of said regulation.

(e) Plants engaged in several activities. If a single plant or operating unit is engaged in several activities which are not all listed on the same schedule (or if some are so listed and others are unlisted), and it is impracticable to apportion requirements for maintenance, repair and operating supplies between such activities, the principal activity alone shall be considered for purposes of determining whether controlled materials may be obtained under paragraph (c) of this regulation and also for determining which preference ratings may be applied under paragraph (d).

(f) Quantity restrictions. A person who uses the MRO rating or symbol assigned by this regulation must not buy any more material and products than is permitted under this paragraph.

(1) General quota. A person must not order for delivery in any calendar quarter MRO (maintenance, repair and operating supplies) costing more than one-

fourth of what he spent for MRO in 1942 (or his fiscal year ending nearest to

December 31, 1942).

(2) Seasonal quota. A person engaged in a seasonal business must not order MRO for delivery on any calendar quarter in an amount more than the amount he spent for MRO in the corresponding quarter of 1942. A person may choose either the seasonal quota explained in this paragraph or the general quota explained in sub-paragraph (1) above, but he may not afterwards change to the other quota without special authorization by the War Production Board.

(3) Quota for new businesses. In the case of a plant or other operating unit which was not in operation during the base periods mentioned in subparagraphs (1) or (2) above, the person operating the plant may take as a quota the amount he spent for MRO during the first quarter of 1943 (or during the part of the quarter the plant was in operation) reasonably adjusted for seasonal or other variable factors. However, he must first notify the War Production Board, in writing, of the base which he is taking, why he is selecting that base, and what adjustments he has made. In the case of a plant starting operations after February 28, 1943, MRO may be bought under this regulation in the minimum amounts necessary for operation up to \$5,000 per quarter. If more than this amount is needed, application may be made to the War Production Board as provided in paragraph (f) (8).

(4) When increased quotas can be used as a base. If a person's quota has been increased by specific authorization of the War Production Board pursuant to application, he may continue to operate on the basis of the increased quota. However, if a substantial part of the increase was to take care of an abnormal situation, as for example, where he required a large amount of special tools and equipment in order to produce a new product, he may not use that increased

quota as a base.7

(5) How to figure the quota. In figuring his quota, a person must include every expenditure during the base period which he charged to a maintenance, repair or operating supplies account. He must not include any expenditure which was charged to a capital account. In each quarter he must charge against his quota (i) everything he buys for MRO, whether he uses the MRO rating and symbol, or another rating or symbol, or no rating; and (ii) material and products he buys for minor capital additions for which he uses the MRO rating or symbol. (Note, that in deciding whether a single capital addition falls within the cost limits of paragraph (b) (3), the cost of all material and products must be included whether a preference rating or symbol is used or not). In figuring his quota, a person may at his option exclude the cost of his own labor, or the cost of any item on List A or B of Priorities Regulation No. 3, as long as he excludes cost of such items both from the computation of the quota and from charges against the quota.

(6) Records. Each person who is subject to this paragraph (f) must figure his quota and must keep his computation and supporting work sheets in his flies for two years after his last purchase under the regulation. He must indicate on his computation any election which he makes under this paragraph (f), and in the case of paragraph (f) (3) "Quota for new businesses" or (f) (4) "When increased quotas can be used as a base", he must indicate the base which he selects. He must also maintain a record of his expenditure for a period of not less than two years.

(7) Treatment of separate plants. A person who has several plants or other operating units which maintain separate records of maintenance, repair and operating supplies shall treat each of them separately for purposes of complying with the provisions of this para-

graph (f).

(8) Applications for increased quota. In any case where the quota provided in this paragraph (f) is not enough for necessary operations, a person may apply for a larger quota by letter in triplicate sent to the War Production Board, Washington 25, D. C., Reference: CMP Regulation 5, stating the relevant facts. Direction No. 18 explains what facts should be set forth in the letter of application.

(9) Persons who use less than \$5,000 a year worth of MRO not limited. The quantity restrictions in this paragraph (f) shall not apply to persons whose aggregate requirements of maintenance, repair and operating supplies do not ex-

ceed \$5,000 per year.

(10) Further reports and limitations in special cases. The War Production Board may, by further regulations or orders, require specified persons or classes of persons to file applications or reports regarding their requirements of maintenance, repair and operating supplies and may prescribe specific quantitative limits for the same, either larger or smaller than the limits provided above in this paragraph (f).

(g) Special provisions for Claimant Agencies, exports and ship repairs. Maintenance, repair, and operating supplies required for export (except to the extent authorized under Direction 20), or by Claimant Agencies as regular procurement items covered by specific programs (except for the purposes mentioned in Schedule A), or material required for ship repairs programmed by the Maritime Commission, shall not be obtained under this regulation, but, if they are controlled materials or Class A

products, shall be obtained only by the use of allotments in the same manner as production materials under CMP Regulation No. 1, and, if they are other materials or products, shall be obtained only by such preference ratings as may be specifically assigned for the purpose.

(g-1) Use of customer's or tenant's MRO symbol and rating. (1) Any person (such as a service repair shop) engaged in the business of doing maintenance or repair work, or the installing of minor capital additions, for others may use the same allotment symbol and preference rating (including any allotment symbol or preference rating assigned for MRO by CMP Regulation 5A or any P or U order) to obtain materials needed in the performance of the work which his customer would be entitled to use if the customer did the work himself. The cost of materials used in the performance of maintenance or repair work, or the installing of minor capital additions, shall be treated as expenditures of the customer for the purpose of computing his quantity restrictions under paragraph (f). A person engaged in such business may, instead, request an allotment of controlled materials and a preference rating by applying to the War Production Board on Form CMP-4B, but, if he does so, he must use that method exclusively and may not use a customer's rating or symbol.

(2) A landlord may use his tenant's allotment symbol and rating to obtain maintenance, repair and operating supplies (including controlled materials) for the leased property if the tenant is engaged in the production of a product or in a business listed in Schedule I or II or if the tenant is assigned a rating or symbol for MRO CMP Regulation 5A or by any P or U order; but if the same property is occupied by several tenants and the supplies are not for the exclusive benefit of a single tenant the landlord may only use a tenant's rating if 75 percent or more of the leased property is leased to tenants on Schedule I or II and, in such case, if any are on Schedule II, he can only use the AA-2 rating.

(3) A person who leases equipment to others which he agrees to keep in good order may use either his own or his customer's rating and symbol (regardless of whether the rating is assigned by this regulation or CMP Regulation 5A or any order in the P or U series) to get materials needed to repair and maintain the

equipment.

(h) Restrictions on use of MRO symbol, rating, and materials—(1) Use of symbol and rating. No person shall use the MRO symbol or the preference rating assigned to him by this regulation to get anything except materials which he needs for essential maintenance, repair or operating supplies, or minor capital additions as permitted by paragraph

See also Interpretation No. 12: An increased quota for a seasonal business may be used only in the same quarter.

(b) (3). If he is assigned different ratings by this regulation for different businesses and it is practicable to segregate his purchases, he must not use a higher rating to get material for a purpose for which he is assigned a lower rating. If it is not practicable for him to segregate his purchases, paragraph (e) explains

what rating he may use.
(2) Use of material. If a person has bought material under this regulation for MRO and then finds that he has another use for it, he may use the material for the other purpose if a preference rating or allotment symbol is assigned to him by any certificate or order for that purpose. However, if he uses the material for another use he may not replace it in inventory by use of the rating or symbol assigned by this regulation. If he replaces it, he must use the rating or symbol assigned for the purpose for which the materials were used. Also, if he uses material bought under this regulation for another use, his records must be adequate to show that his purchases of material are substantially proportionate to his authorized uses. For example, a manu-facturer has a rating of AA-2 under this regulation for MRO and also has a rating of AA-3 for a construction project. He may take lumber from his MRO inventory which he bought on the AA-2 rating and use it on the construction job, but if he replaces it in his inventory he must use the AA-3 rating for this purpose, so that he will not, in effect, have filled both his MRO and his construction requirements at the AA-2 rating. Exchanges of this kind may be made only where the material is acquired in good faith for use as MRO. The manufacturer may not use the AA-2 ratings to get lumber if he is getting it specifically for use in the construction project.

(i) Inventory restrictions. Nothing in this regulation shall be deemed to authorize any person to receive any delivery of maintenance, repair or operating supplies if acceptance thereof would increase his inventory above a practicable working minimum as provided in § 944.14 of Priorities Regulation No. 1 or would exceed the inventory limitations prescribed for such person by CMP Regulation No. 2, or by any other applicable regulation or order of the War Produc-

tion Board.

(j) Additional assistance in individual cases. Any person requiring maintenance, repair or operating supplies who is unable to obtain them with the rating assigned to him by this regulation, and any person requiring any controlled material for maintenance, repair or operating supplies who is not listed in Schedule A and who is unable to obtain it from a warehouse or distributor under CMP Regulation No. 4 may apply to the nearest local office of War Production Board on Form WPB-541 (formerly PD-1A) for a higher rating, or the right to use the MRO symbol to obtain controlled materials. Application for an

increase in the quantity of expenditures for maintenance, repair and operating supplies permitted by paragraph (f) of this regulation shall, however, be filed in the manner specified in subparagraph

(8) of paragraph (f).

(k) Effect on other orders and procedures. (1) The preference ratings and allotment symbols assigned by this regulation may be used by any person, unless he is engaged in an activity or business which is covered by an order in the P or U series which specifically provide that the ratings assigned by CMP Regulation No. 5 may not be used.

(2) [Deleted Feb. 26, 1944](3) [Deleted Feb. 26, 1944]

(4) When an order in the "E", "L" or "M" series assigns a specific preference rating to deliveries of any particular material to be used by a particular industry or for a specific purpose, such preference rating shall control and the preference ratings hereby assigned may not be applied.

(5) Nothing in this regulation shall be construed to relieve any person from complying with any applicable priorities regulation or order of the War Production Board (including orders in the "E," "L" and "M" series) or with any order of any other competent authority.

(1) Industry reclassification. person who is of the opinion that the business activity in which he is engaged should be assigned a higher preference rating for its MRO than it is assigned by this regulation may apply to have such higher rating assigned by filing a letter, in triplicate, with the appropriate Industry Division setting forth the relevant facts and the reasons why he considers such request should be granted.

The War Production Board may assign the higher rating to such activity by appropriate amendment to Schedule A or, in special cases, may permit the applicant to operate under this regulation to the same extent as though his business activity were so listed in Schedule A.

(m) Records. Each person acquiring maintenance, repair or operating supplies pursuant to this regulation shall keep and preserve, for a period of not less than two years, accurate and complete records of all such supplies so acquired, and used, which shall, upon request, be submitted to audit and inspection by duly authorized representatives of the War Production Board.

(n) Communications. All communications concerning this regulation should be addressed to: War Production Board, Washington 25, D. C., Ref: CMP Regulation No. 5.

(o) Restriction on use of ratings. The preference rating assigned by this regulation cannot be used to get any of the items shown on List A or B of Priorities Regulation No. 3.

(p) Penalties for misrepresentation. The placing of any order bearing a certification or symbol as provided by this regulation shall constitute a representation, subject to the criminal penalties of section 35 (A) of the United States Criminal Code (18 U.S. C. 80), that the person placing the order is entitled, under the terms of this regulation to use of the symbol or preference rating indicated

Issued this 28th day of September 1944.

> WAR PRODUCTION BOARD, By J. JOSEPH WHELAN. Recording Secretary.

#### INTERPRETATION 2

A person who is permitted to get controlled materials under paragraph (c) (1) of CMP Regulation No. 5 for maintenance, repair and operating supplies is not entitled to use the MRO symbol for purposes of allotting controlled materials to others. For example, a manufacturer of a product listed in Schedule A of the regulation requires a spring as a repair part. He may use the spring as a repair part. He may use the MRO symbol to place an authorized controlled material order for steel which he will fabricate into the spring which he requires, but if he buys the spring from a spring manufacturer, he may not make an allotment with the MRO symbol to the spring manufacturer. The spring manufacturer receives his allotment direct from the MRO symbol to the spring manufacturer receives his allotment direct from the War Production Board as provided in paragraph (k-1) of CMP Regulation No. 1. sued April 20, 1943.)

GENERAL OFFICES, BRANCH OFFICES, SALESROOMS, ETC.

The ratings and symbol assigned by CMP Regulation No. 5 to a particular business may be used to obtain maintenance, repair and operating supplies for general offices, branch offices, salesrooms and other facilities essential to the conduct of the business. (Issued May 20, 1943.)

#### INTERPRETATION 6

#### COMMON CARRIERS

Persons engaged in "public transportation" are included in Schedule A of CMP Regulation No. 5. This term includes any person who holds himself out to the general public as engaged in transportation, regardless of how he is classified under any Federal or State statute. Any person who would be considered a common carrier under common law is included within the term.

A private or contract carrier is not included. (Issued May 20, 1943.)

## INTERPRETATION 7

#### MANUFACTURE AND DISTRIBUTION OF FOOD PRODUCTS

(a) "Industrial food manufacturing, processing, packaging, preservation and storage" is included in Schedule A of CMP Regulation No. 5 and persons engaged in such occupation are entitled to use a rating of AA-1 and the MRO symbol in purchasing maintenance, repair and operating supplies needed in connection with the conduct of their business.

(b) Distribution of food products, as distinct from their production, does not con-stitute industrial food manufacturing or processing under Schedule A and is not included elsewhere in Schedule A of the regulation. Persons engaged in selling food products which they do not produce are only entitled to use the AA-5 rating to obtain maintenance, repair and operating supplies for their business.

(c) In those cases where a person is engaged in both producing and distributing food products he may, under paragraph (e) of the regulation, obtain his entire main-tenance, repair and operating supply require-ments at the rating assigned to the principal activity in which he is engaged where, and only where, it is impracticable to apportion requirements to his several activities. (Issued May 27, 1943.)

## INTERPRETATION 8

CAPITALIZED REPAIRS

Products or materials needed for repairs or replacements which are capitalized cannot be obtained under CMP Regulation No. 5 [§ 3175.5] except to the extent permitted by paragraph (b) (3) of the regulation relating to minor capital additions costing less than \$500. (Issued July 17, 1943.)

#### INTERPRETATION 9

RELATIONSHIP BETWEEN CMP REGULATION NO. 5 AND CONSERVATION ORDER L-41

(a) Order L-41 requires War Production Board authorization before beginning any construction work except in those cases where the order expressly states that authorization is not necessary.

(b) CMP Regulation No. 5 (§ 3175.5) may

(b) CMP Regulation No. 5 (§ 3175.5) may not be used to get materials or products for any construction work of the type which requires authorization under Order L-41, unless the authorization specifically says that CMP Regulation No. 5 may be used.

(c) In those cases where specific War Production Board authorization is not required before beginning construction, and where the materials needed for the construction cost no more than \$500, CMP Regulation No. 5 may be used to buy materials and products needed for the construction. (Issued July 29, 1943.)

## INTERPRETATION 10

CONCRETE AND AGGREGATES

The term "products for structural use not elsewhere listed" appearing under "Building Materials" on Schedule A of CMP Regulation No. 5 includes light-weight aggregates, ready-mixed concrete and pre-mixed bituminous concrete. (Issued Nov. 9, 1943.)

#### INTERPRETATION 11

PURCHASER'S COST OF LABOR FOR MINOR CAPITAL ADDITIONS

Interpretation No. 11 to CMP Regulation No. 5 is amended to read as follows: (a) Paragraph (b) (3) of CMP Regulation No. 5 permits the use of the MRO symbol and rating to get materials or equipment for a minor capital addition, where the cost of the minor capital addition does not exceed \$500 "excluding the purchaser's cost of labor."

(b) This means that the cost of the materials or equipment going into the minor capital addition must not exceed \$500. The cost of labor for the manufacture of the materials or equipment must be included in figuring their cost. The cost of labor used in construction or installation of the minor capital addition need not be included.

(c) This applies whether the owner of the plant uses his own employees to do the construction or installation work or hires an independent contractor to supply this construction or installation labor.

(d) It also applies where the owner of the plant gets an independent contractor to furnish the materials and the labor for the job, and where the owner of the plant buys a machine or other article and has the seller do the work of installation.

(e) Direction 15 to CMP Regulation 5 explains the rules for buying \$500 worth of materials needed for installation or relocation of equipment which is not bought by use of the MRO rating or symbol. In that case, the same principles apply in determining what labor costs are to be included. Issued May 22. 1944.)

## INTERPRETATION 12

INCREASED QUOTAS FOR SEASONAL BUSINESSES

(a) Paragraph (f) (4) of CMP Regulation No. 5 as amended on February 26, 1944, permits the use of a specific quota authorization as an increased quota for all following quarters. Thus if a particular company's quota

has been increased by specific authorization during the fourth quarter of 1943 from \$100,-000 to \$125,000 the company has a quota for each succeeding quarter of \$125,000.

(b) In the case of a person operating under a seasonal quota under paragraph (f) (2), his quarterly quota varies from quarter to quarter based on the similar quarter of 1942. Consequently, when a seasonal quota has been increased by specific authorization for any one quarter, that increase does not increase all succeeding quarters, but may only be used as an increased quota during the same quarter of the following year. Thus if a company operating on a seasonal basis had a quota during the third quarter of 1943 of \$10,000, and during the fourth quarter of 1943 of \$50,000 and received an increase of the fourth quarter's quota from \$50,000 to \$60,000, its quota for the third quarter of 1944 would remain at \$10,000, although its fourth quarter quota of 1944 would become \$60,000.

(c) Where a company has received succeeding special authorizations increasing a quota, and where it is not on a seasonal basis, the last special authorization determines the company's quota during each following quarter. (Issued April 10, 1944.)

## INTERPRETATION 13

## STAVES, HEADING, AND HOOPS

(a) Persons manufacturing wooden staves, heading, and hoops for barrels are included under the item "logging operations, saw mills, veneer mills, plywood mills, planing mills, shingle mills, and dry kilns operated in connection with saw mills" appearing in Schedule A of the regulation. They are, therefore, entitled to use the allotment symbol MRO and the preference rating AA-1 in buying MRO.

(b) Persons who make barrels as such are engaged in manufacturing "containers, all types except fibre containers, gas cylinders and ton containers, and nailed wooden boxes and crates" which appears in Schedule A of CMP Regulation 5. They may use, therefore, the MRO symbol and preference rating AA-2 in buying MRO. A person who makes both staves and barrels must segregate his purchases, unless impracticable to do so as explained in paragraph (e) of the regulation. (Issued April 18, 1944.)

## INTERPRETATION 14

## PLANTS ENGAGED IN SEVERAL ACTIVITIES

Where a plant is engaged for the majority of a year principally in the production of a certain item listed in a schedule of CMP Regulation No. 5, and for a brief period during that year produces an item listed in another schedule of CMP Regulation No. 5, or produces an item which is unlisted, that plant, pursuant to paragraph (e) of CMP Regulation No. 5, may at all times use the rating assigned to the principal activity to procure maintenance, repair and operating supplies.

Example. A distillery which is producing industrial alcohol under Order M-69 may use the AA-1 MRO rating, assigned in Schedule A under Chemicals and Allied Products for the procurement of maintenance, repair and op-erating supplies. If that distillery has been authorized to operate its facilities exempt from the provisions of paragraph (b) and (e) of Order M-69 for the month of August, 1944, it may continue to use the AA-1 MRO rating for maintenance, repair and operating supplies. Similarly, if an industrial alcohol plant has been authorized under M-30 to tax pay or to deliver in bond for the purpose of tax paying, a portion of his production, such an authorization will not affect his right to use an AA-1 rating for maintenance, repair and operating supplies. PART 3281-PULP AND PAPER

[General Preference Order M-93, Direction 1, as Amended Sept. 28, 1944]

PREFERRED STATUS OF CERTAIN DELIVERIES AND USES OF WOOD PULP

The following direction is issued pursuant to General Preference Order M-93:

(a) Reasons for this direction. A producer's output of wood pulp is allocated by the War Production Board for his own uses and for delivery to other consumers on the basis of the amount which he reports to the War Production Board as his estimated output. If he over-estimates his production, it is necessary and appropriate in the public interest and to promote the national defense to assure that this does not result in cutting off wood pulp from the consumers to whom it was allocated and who have no other source of supply for the continuance of their minioperations, and to assure that any necessary reductions are made in those grades of paper and paperboard not listed in para-

graph (d) below.
(b) Producers. If a producer is unable during any calendar quarter to make all deliveries which he has been directed on Form WPB-699 to make, he shall reduce his de-liveries to himself to the extent necessary to complete all deliveries to consumers other

than himself. (c) Consumers. If a consumer during any calendar quarter has, or anticipates that he will have, inventory and receipts of wood pulp less than the amount of wood pulp he is authorized on Form WPB-2973 to consume, he shall not use in the production of grades of paper and paperboard other than listed in paragraph (d) below more wood pulp than the amount calculated by subtracting (1) the amount of his above-mentioned shortage of wood pulp from (2) the total amount of wood pulp he is authorized on Form WPB-2973 to use in the production of grades of paper and paperboard other

than those listed in paragraph (d) below.

PART 1351—FOOD AND FOOD PRODUCTS [FPR 1,2 Amdt. 11 to Supp. 7]

PACKED FRUITS, BERRIES AND VEGETABLES OF THE 1944 AND LATER PACKS

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.\*

Supplement 7 to Food Products Regulation No. 1 is amended in the following respects:

1. Section 14 (d) is amended by adding the following sentence: "The establishment for the first time of maximum prices or a pricing method for an item in this supplement does not require notification.

2. In Appendix C to section 15, the "Explanation of how maximum prices for packed peas are figured" is amended in the following respects:

a. The phrase "section 5 (a) 2" at the end of the first sentence is amended to read "section 5 (a) (2)"

b. The following sentence is added to

the second undesignated paragraph:

However, this rule does not apply when the only grade of packed peas sold during the base period was substandard grade.

c. The first sentence in the seventh undesignated paragraph is amended to read as follows:

The order in which the steps are to be taken in figuring the maximum price for an item of packed peas under subparagraph (2). (3) or (4) of section 5 (a) is as follows (however, note Exceptions below):

- d. Step 8 in the seventh undesignated paragraph is amended by inserting a parenthesis after the figure "5" and deleting the parenthesis after the word "agencies"
- e. The following text is added to the seventh undesignated paragraph:

Exception 1: If the processor sold only substandard grade of packed peas in the base period, the steps and the order in which they are to be taken differ from those set forth above. In this situation, the steps are as follows:

First, convert for container size;

Next, convert to Standard grade;

Next, add the appropriate permitted increase for Standard grade;

Then, proceed with step 3 and the following steps in the usual order as specified above.

Exception 2: If the processor is pricing substandard grade, the steps and order in which they are to be taken differ from those set forth above. In this situation, step 4 must follow step 6 instead of preceding step 5; otherwise, steps are to be taken in the usual order as set forth above.

Note: Both Exceptions 1 and 2 apply where the processor sold only substandard grade in the base period and is now pricing substandard grade. In this situation the usual procedure is varied in the manner indicated by both Exceptions.

3. In Table 3, Area 1, of Appendix B to section 16, the figures "2.07-2.39" in the column headed "Price ranges" under the column headed "No. 2½ Cans", and opposite the word "Standard" under "Halves, unpeeled" in the column headed "Style and grade", are amended to read "2.15-2.31".

This amendment shall become effective September 27, 1944.

Issued this 27th day of September 1944.

CEILING PRICES OF CERTAIN FOODS SOLD AT WHOLESALE

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.\*

Maximum Price Regulation 421 is amended in the following respects:

- 1. Section 13 (d) is added to read as
- (d) 1944 pack of "canned" and frozen fruits and vegetables. Each item of the 1944 pack of "canned" fruits and vegetables and frozen fruits and vegetables shall be considered a different item from the 1943 and earlier packs, and you shall figure a separate ceiling price for each item. You must figure your ceiling price for each such item in accordance with the provisions in sections 3, 4 and 5, basing your "net cost" on the first delivery to you of the item.

However, if that first delivery is re-ceived by you before the date on which maximum prices are established by the OPA for sales of the item by processors, and another delivery is received by you after that date, you shall refigure your ceiling price for such item, basing your "net cost" on the first delivery of the item to you after that date.

The receipt of any of the above items of the 1944 pack, at a price to be adjusted after delivery in accordance with action to be taken by the OPA shall not be deemed a delivery, for the purpose of this section, until the receipt of an invoice or other written notice from your supplier showing the price after adjustment. Until the receipt of such an invoice or notice, you may not sell or deliver or offer to sell or deliver the item at a price higher than your ceiling price for the same item of the 1943 pack.

- 2. Section 32 (b) (12) is amended to read as follows:
- (12) "Fruits, dried and dehydrated" (packaged or bulk) includes, but is not limited to, fresh dates, stuffed dried fruits, dried dates and figs, pitted dates, and macerated dates. Excluded are fruit confections, candied or glaced fruits and peels, and date products.

Note: The 1943 pack of dried fruits shall be considered a different item from the 1942 pack of dried fruits, and you must figure separate ceiling prices for each item of the 1943 pack. The 1944 pack shall also be considered a different item from the 1943 and earlier packs, and you must figure separate ceiling prices for each item of the 1944 pack.

This amendment shall become effective September 27, 1944.

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.\*

Maximum Price Regulation No. 33 is amended in the following respects:

- 1. Section 1307.67 (d) is amended to read as follows:
- (d) Premiums for knotless and lapless yarns. The maximum prices for carded cotton yarns which are both knotless and lapless shall be the applicable maximum price for the base-grade yarn adjusted in accordance with the following premiums:

Up to and including 16s\_\_\_\_\_\_\_2.0
Above 16s\_\_\_\_\_\_\_3.0

The premiums permissible hereunder are applicable only where the yarn is to be used for products in the manufacture of which knotless and lapless yarns were used prior to January 1, 1942, and where the seller receives a written statement to that effect from the buyer. The seller shall preserve the statement for not less than two years.

2. Section 1307.67 (f) (1) is amended to read as follows:

(1) Discounts for yarns containing low-grade totton and/or cotton waste. The maximum price for carded cotton varn which contains low-grade cotton and/or cotton waste shall be a price in line with the maximum price set forth herein for base-grade yarn of the same number and ply. As used herein, the term "in line with" means having a justifiable relation to the maximum price for the base-grade yarn of the same number and ply with a decrease in price commensurate with the decrease in his material costs \* resulting from his use of the low-grade cotton and/or cotton waste. In determining his "in line with" price, allowance may be made by the producer for increased manufacturing costs which he may incur in producing such yarns. Solely for the purposes of computing an "in line with" price under this paragraph a producer shall employ the following maximum prices for base-grade yarns of numbers less than 6:

#### [Cents per pound]

Yarn No.	Single	Ply
1s	37, 25 37, 50 37, 75 38, 00 38, 25	39, 75 40, 00 40, 25 40, 50 40, 75

3. In § 1307.67 (j) the premium of "6%" is changed to "5.4%".

4. In § 1307.67 (k) the premiums of "10", "7½" and "5" percent are changed

For the purposes of this Maximum Price Regulation No. 33, any cotton is "low-grade" which is quoted at a price lower than the replacement price quoted for strict low middling (white) cotton of the same staple length in such weekly quotations, appropriately adjusted for location, as are or may hereafter—be published by the War Food Administration.

\*The producer shall determine the decrease in his material costs in the following ways: (a) When he uses low-grade cotton he shall determine the difference in replacement price between the low-grade cotton and strict low middling (white) cotton of the same staple length set forth in such weekly quotations, appropriately adjusted for location, as are or may hereafter be published by the War Food Administration; and (b) when he uses cotton waste, he shall use the difference between the replacement cost for such cotton waste, and the replacement price quoted for strict low middling (white) cotton of the staple length specified for the same yarn number in footnote 11 (paragraph (g) of this § 1307.67) in such weekly quotations, appropriately adjusted for location, as are or may hereafter be published by the War Food Administration.

to "9", "6 $\frac{3}{4}$ " and " $\frac{4}{2}$ " percent, respectively.

NOTE: The record-keeping provision of this amendment to Maximum Price Regulation No. 33 has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This amendment shall become effective October 3, 1944.

PART 1499—COMMODITIES AND SERVICES [SR 15 to GMPR, Amdt. 33]

CONTRACT CARRIER, STORAGE AND TERMINAL SERVICES

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.\*

Section 1499.75 (a) (3) of Supplementary Regulation No. 15 is amended to read as follows:

(3) Contract carrier, storage and terminal services. The Office of Price Administration, or any regional office thereof, may adjust the maximum prices (rates) established under the General Maximum Price Regulation for any person supplying service as a contract carrier, or for any person supplying storage or terminal services,1 if it finds (i) that such maximum price subjects such person to substantial hardship and (ii) that the adjustment requested is necessary to permit the continuance of the supply of an essential service for which there is no adequate substitute available at a price lower than the maximum price requested.

A contract carrier who has applied, or is about to apply, for an adjustment under this sub-paragraph may agree to supply services from the date on which the application is filed with the Office of Price Administration at a price no higher than the maximum price for which he has applied. However, no payment above the existing maximum price may be made or received until a higher price has been authorized by an order of the Office of Price Administration containing no restriction against such payment. A contract carrier wishing to make any such agreement must advise the shipper that he has applied, or is about to apply, to the Office of Price Administration for a specified increase in his existing maximum price and that he may not receive any payment above his existing maximum price until a higher price has been authorized by the Office of Price Administration.

Applications for adjustment shall be filed with the regional office of the Office of Price Administration in the region in which the service or services involved in the application are performed except that where an applicant supplies service

<sup>\*</sup>Copies may be obtained from the Office of Price Administration.

<sup>&</sup>lt;sup>1</sup>See Supplementary Regulation 11 for exemption from the General Maximum Price Regulation of storage and terminal services rendered by persons classified as Public Utilities whose rates are established or otherwise regulated by a Federal, State or Municipal authority.

in more than one region, or supplies service in interstate commerce as a contract carrier, an application shall be filed with the Office of Price Administration. Washington, D. C.

The Regional Administrator of Region IX may delegate to any Territorial Director within his region the functions, duties, powers, and authority conferred on such Regional Administrator by this sub-paragraph.

A list of the regional offices with an enumeration of the states included in each region is set forth in Appendix A,

(c), to this regulation.

Applications for adjustment under this sub-paragraph submitted by contract carriers shall be filed on and contain the information required by O. P. A. Forms 644-602 and 603. No form is prescribed for application for adjustment of prices for storage and terminal services but such applications shall contain the following information:

(a) Description of applicant's business, including services performed, locations, principal commodities involved, names and addresses of companies financially or otherwise affiliated, if any.

(b) Present and requested maximum rates, present and requested rules or conditions. If the terms used to identify the rates do not adequately show just what services are performed for these charges, additional descriptions of the

services should be furnished.
(c) Detailed annual profit and loss statements in the form customarily prepared and supported by balance sheets in customary form for the calendar years 1939, 1940, 1941, or for fiscal years ending within these calendar years, if such fiscal years are customary, or if these are unavailable, OPA Financial Reporting Form A for these years. Profit and loss statement for the most recent 12 month period which is available, supported by a detailed balance sheet as at the end of that 12 month period. Revenue accounts should be supported by statements of volume of business in terms of tons, square feet occupied, or other units which may be customary. Any substantial changes in property or equipment accounts should be explained.

If any increase in rates has been granted by the Office of Price Administration during the most recent 12 month period, applicant should show as nearly as possible the amount of additional revenue derived from such increase. Applicant should also furnish his best estimate of the revenue to be derived from

the proposed increase.

If only part of applicant's business is involved in the requested increase, revenue accounts should be shown separately for the principal divisions of revenue customarily made. Minor amounts may be shown as "other revenues". In addition, if the revenues from the particular services, charges for which are sought to be increased, are not separately stated in the customary division, they should be estimated as closely as practicable.

Insofar as practicable, expenses for the services involved should also be shown separately. Expenses which are charged directly to these services should be distinguished from those which are allocated, and the methods whereby portions of joint expenses are charged against the services involved should be explained. Property and equipment or portions thereof devoted to the involved services should also be identified.

If any of this information has already been furnished in connection with other applications for adjustment or on Forms A and B, such information need not be repeated but may be incorporated into the application by reference.

(d) Statement of the names and addresses of applicant's principal competitors, together with their rates, if available, for similar services. An explanation of any significant differences in

these services.

(e) If applicant has any other applications for price or rate increases affecting any part of his business pending or recently granted, reference should be made to the offices where filed and docket or order numbers. Increases made in portions of applicant's business as a regulated common carrier or public utility, if any, should be identified by reference to notices filed with the Office of Price Administration under Procedural Regulation No. 11. In suitable cases, this requirement would be met by such statements as "Notices filed by the ---- Freight Bureau in whose tariffs we participate."

(f) Applicant is free to supply other information which, in his opinion, will support the findings required by this sub-

paragraph.

This amendment shall become effective October 3, 1944.

Issued this 28th day of September 1944.
